

Ocean conservation is failing.

**And it's not
a money problem.**

It's something almost nobody is talking about.

THE REAL PROBLEM

Everyone is
doing the right
thing.
Alone.

→ **Curious people**

read articles, never act

→ **Researchers**

can't find volunteers

→ **Tour operators**

run trips no one finds

→ **Municipalities**

host cleanups in empty rooms

→ **Companies**

report numbers nobody can verify

THE DIAGNOSIS

The ocean
doesn't have a
knowledge problem.

It has a
coordination
problem.

*Five different audiences. Zero shared infrastructure.
That's why the money disappears without impact.*

WHAT WE BUILT

OceanQuest.

**One platform. Five audiences.
One verified ocean-action
engine.**

Curious people, researchers, tour operators, municipalities, and companies with CSRD obligations — finally connected through the same gamified action layer.

FOR PRIVATE USERS

From scrolling to actually doing.

LEARN

About the ocean — without academic PDFs.

JOIN

Real cleanups, dives, and conservation trips near you.

CREATE

Publish your own quests. Anyone can host.

TRACK

Build a verified record of your ocean impact.

No lectures. No guilt. Just action that counts.

Verified impact. Not vibes.

COMPANIES

CSRD-ready ocean impact data. Audit-grade numbers from real, logged actions — not estimates.

RESEARCHERS

A distribution channel for fieldwork. Find the volunteers you've been struggling to reach.

MUNICIPALITIES & OPERATORS

Publish events as quests. Reach people who actually want to be there.

The connective tissue the ocean industry was missing.

THE THESIS

**The next decade
of ocean conservation
won't be won by
the loudest campaign
or the biggest report.**

**It will be won by
whoever builds the
connective tissue.**

OCEANQUEST IS LIVE

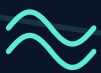

Your move.

If you're curious — sign up, browse quests near you, or publish your first one.

If you're a company, researcher, municipality or operator — let's talk.
